 Photography: [Remoto](#)

We are proud to present the first reference of **Cicuta Netlabel's** project, a project full of work, enthusiasm, conceived to be a nexus between the specialized audience and the great mass, among the great artists of the scene and producers who seek an opportunity. In summary, a project created by and for everyone.

The first reference is a mirror of the purpose of the project, an interesting mix of musical shapes. On the one hand we have **Kike Pravda**, one of the most respected artists in terms of dark techno in northern Spain. Also we have **i1 Ambivalent** from Croatia, one of the emerging European techno producers, with a sound tracker, but still dark. On the other hand we have **Vegim**, owner of TMM (*Take More Music Records*), which is one of Europe's most respected producers in the techno circuit, with a lot of releases and remixes on his back since 2006.

As a counterpoint, we have the Catalan producers **Mootiv**, **One D** and **Edrian Sailing**, bringing a more melodic techno with sounds fresh and elegant. **Mootiv** is no stranger far, has published among other labels in *Soundfate* (owned by *Dosem*) and *Inoquo* (one of the most respected netlabels worldwide). His success is no accident; he's film composer, visual artist and sound engineer, besides acting as a teacher in the ERAM (School of Audiovisual and Multimedia). **One D**, meanwhile, is following the footsteps of **Mootiv**, both for its quality and its success, having also published in *Soundfate*, and many projects in the medium and long term. About **Edrian**, this is his first project in his role as producer, and it will be not the last, sure...

To close the EP we have a own track. From **Drugstore** try to put a different point, with unconventional sounds, a sound closer to the music that we have always placed in our netaudio side.

Relax, listen and enjoy. Welcome, this is **Cicuta Netlabel**.
