Welcome to the fourth release of **Cicuta Netlabel**. Many times, in private circles, discussed about the large number of new promises that are working hard in the dark and certainly deserve to have their work exhibited to the public. This time, we want to present one of these guys, from Burgos (Spain), **Hyo**.

Hyo presents 3 tracks of similar cut between them. Dark, atmospheric, industrial with a touch reminiscent sounds of the golden age of Spanish dark techno, and, of course, have nothing to envy to the music from best known and most renowned artists. Undoubtedly, if you are dark-techno lover, is a name to put in the agenda...

As for the *remixers*, first we are proud to introduce you to *Edgar Aizpurs*, better known as **Po**, Latvian producer that many will remember by his legendary track *Jannete* published in the late Belgian netlabel *Ante-Rasa*, and since then we keep track for his quality, especially in the atmosphere management.

Moreover, we have from León (Spain) to **Bran Lanen**, one of these different artists, that by simply talking to him you know he will not leave you indifferent. Classic techno lover, hardware defender and production geek. Adjectives are a little extreme, but you also probably be after listening to his music.

Finally, and as always, from **Drugstore** try to contribute into EP with a remix. Is a more serious and thoughtful work than at other times, but the script demanded it...

Relax, listen and enjoy. Welcome, this is **Cicuta Netlabel**.
