May is the gateway to the summer, a month of contrasts, from the summer heat to the cold spring. For **Cicuta Netlabel**, this release is a good analogy to this, because we can go from powerful and dark techno to the most melodic and danceable techno.

We open the EP with Irish **Luke Creed**, one of the headers of new techno generations. At just 23 years has managed to publish in some of the most influential labels, such as *TMM Records*, *Elektrax* or *Heaven to Hell*, getting very good feedback from the heavyweights of the scene. It is also *Gobsmacked Records* label manager with *Diarmaid O'Meara*, which has been working since 2007 with a great success.

We continue with one of the new values of the prolific Spanish quarry, **Jose Puj**. After releasing on labels such as *Tsunami* and *Warm Up*, no one doubts the quality and talent of this producer. Another project in which is having success with his own label, *Injected Poison*, which is distributed worldwide and features artists like *Oscar Mulero* or *Kike Pravda*.

The next artist that we present is the Australian **Allan Nonamaka**, co-manager of *Fervent* label, and an excellent producer. Although it may sound unfamiliar to someone, has already published two references in *Labrynth* and published with *Inigo Kennedy* in *Fervent*, so stay tuned, is a name to watch.

Then we return to the national product, presenting an issue of **Moitan**, whose components are old acquaintances and friends of *Cicuta*, *Loisan* and *Mootiv*. As separately, his style is fresh, dynamic, with a techno that does not let you have your feet on the ground, with lots of groove.

Another old friend who returns to publish with us is **David Reina**, who this time brings a deep track, hypnotic, not for heart disease. Possibly one of the best work we've had the pleasure of publishing in our short existence.

Finally, as usual, from **Drugstore** we present our own work. This time we bring a very eclectic track, without style, designed for people with no musical barriers and prejudice.

Relax, listen and enjoy. Welcome, this is **Cicuta Netlabel**.
